Profile

I'm a software engineering student at Addis Ababa University who loves turning ideas into real, working solutions. I'm curious by nature and enjoy digging into problems, especially when it means building something secure, smart, and genuinely useful. Over the years, I've built a strong foundation in programming, not just from classes, but through real life projects where I've learned what it really takes to build scalable systems and work with new technologies. I care about clean code, thoughtful design, and using tech to solve real problems in people's lives.

Education

Bachelor of Science in Software Engineering, Cyber Security Stream

Addis Ababa University, Addis Ababa, Ethiopia

Expected Graduation: [June, 2026]

Relevant Coursework:

- Software Project Management
 - Artificial Intelligence
 - Web Development
 - Mobile Application Development
 - Cyber Security
-

Technical Skills

- Programming Languages: Python, Javascript, Html, Css, Flutter, Node.js, express.js
 - Tools & Frameworks: Figma, Git, JIRA, Tailwind, Bootstrap, Bulma, React
 - Software: Microsoft Office Suite, Visual Studio Code, Jupyter Notebook
-

Soft skills

- Team work: Collaborated effectively during group projects.
 - Communication: Strong verbal and communication skills.
-

Projects

- Engaged in various web development projects, both collaboratively within teams and individually.
 - Contributed to mobile application development using Flutter and Kotlin
-

Experience

Intern at Prodigy Info Tech(July,2024)

- Completed a one month internship in Web development at Prodigy Info Tech.
- Gained a hands-on experience with responsive design

Intern at Addis Ababa Institute of Technology (Dec,2024)

- Currently gaining hands-on experience in software development and system design.
- Working on real-world projects

Intern at Moti Engineering PLC(July, 2025)

- Developing fullstack web applications using **React.js**, **Node.js**, and **MongoDB**
- Building responsive user interfaces and integrated APIs to support real-time features and smooth user experience
- Collaborating with the dev team to troubleshoot bugs, optimize performance, and deliver clean, scalable code

Intern at Information Network and Security Administration (March,

2025 - June 2025)

- Actively involved in cyber security practices and network security
 - Worked with security tools.
-

Certifications

- Certification of Completion, Cisco networking academy, 2023
 - Certification of Completion, VMware IT Academy, 2025
 - Certification of Completion, Cyber Security Fundamentals, IBM Skills Build, 2025
-

Languages

- English
- Amharic
